

Department of Computer Science

CPCS403 Assignment # 1

Advanced Web Development & Custom Website Creation

Spring Semester 2026

Instructor: Dr. Samar Alkharigy

Date: 4th of April 2026

Student Name	ID	Section
Raghad Abdullah AlZahrani	2206740	DAR
Aseel Musaid Alamri	2108290	
Shahenaz Abushanab	2215050	

Website Title: SkillHub

1. Project Idea

SkillHub is a student workshop website that allows users to explore workshop categories, view schedules, and simulate booking a workshop seat. It was designed to show the main idea of a platform that helps students find suitable workshops and access their basic details easily.

2. Our Website

The domain of our website is <https://nozanooni.github.io/SkillHub-403/>. Currently, we are in the first phase of our project, we have successfully completed six primary pages: Home, Services, Schedule, Guide, Feedback and the About page. Each page is structured using HTML, CSS, and JavaScript to ensure interactive functionality, adhering to modern web development standards and best UI/UX practices. Future phases will introduce the backend of our website and enhance its capabilities.

Note: The booking and feedback features in this project are only front-end simulations added to show how the website is expected to work. No backend or database was developed, so the entered data is processed temporarily using JavaScript only and is not actually saved or submitted anywhere.
